Cecil Chris-Esema

Secure Coder

I am a young and very ambitious developer with a proven admiration for security, looking to enhance my knowledge and to assist in the establishment of secure enterprise wide applications and architectures. Moreover I look forward to working with various teams and experts, to test software and embrace every opportunity to harden systems against new and emerging threats.

WORK EXPERIENCE

Secure Coding Intern
NTT Group (Dimension Data Security)

06/2019 – Present   *Bryanston, Johannesburg*

- Mainly focused on integrating secure coding principles into development practices to ensure secure-by-design applications at an early stage.
- Rotated around the business units and worked alongside subject- matter experts in seeking solutions.
- Britehouse Project: Featured in the Automation team during the course of a full PI 1, for a product referred to as the Justin Time project.
- Graduate Project : Debut feature in a self-paced project, a security enablement tool for internal use, Dimension Data Dash.
- Graduate Project: Featured in on the UX design for a product called Doctrina, an in-house division recruitment tool for graduates.
- Communicated effectively and professionally in all forms of communication.
- Established the role of an Agile developer within a Scrum Team in the aforementioned projects (SAP and Doctrina).
